

North Dakota

GROWING NORTH DAKOTA'S ECONOMY

Clean energy investment is estimated

to add **\$12 billion**

to the state's economy from 2025-2035

Due to federal programs and clean energy tax credits, a new report—commissioned by ACP and conducted by ICF—estimates the American energy industry will deliver significant economic growth and job creation to North Dakota.

2025-2035 Forecast for North Dakota

Delivering Jobs

95,300 FTEs¹

● Transportation	21,600
● Power Sector	32,700
● Buildings	8,400
● H2	10,800
● Sustainable Aviation Fuel	15,400
● Manufacturing	6,400

The package of energy tax incentives, grants, and other programs creates tremendous opportunities for job creation and economic growth.

From 2025-2035, the IRA is estimated to deliver **95,300 FTEs** across North Dakota—or around **8,700 jobs** per year.

Boosting Income

\$6 billion

in additional income for North Dakotans

Promoting Spending in North Dakota's Economy

\$26 billion

of spending resulting from investments in American energy infrastructure
