

ACP Workforce Certification & Enterprise Recognition

Effective June 1, 2026

Advancing Workforce Readiness Through Certification

As the clean energy workforce continues to grow, companies need a consistent, industry-recognized way to validate technician competency, strengthen safety performance, and support workforce mobility.

ACP's workforce certifications provide an independent certification framework developed by industry, for industry, enabling companies to align workforce development with nationally recognized competency standards.

Why Companies Choose ACP Certification

- **Validate technician competency** against industry-defined standards
- **Improve workforce consistency** across sites and contractors
- **Support safer operations** and stronger quality performance
- **Create portable credentials** recognized across the industry
- **Reduce duplication** by aligning existing training with ACP standards

Already have a strong internal competency assessment program?

ACP's Enterprise Recognition pathway helps companies validate their existing competency assessment programs rather than starting from scratch.

Companies can:

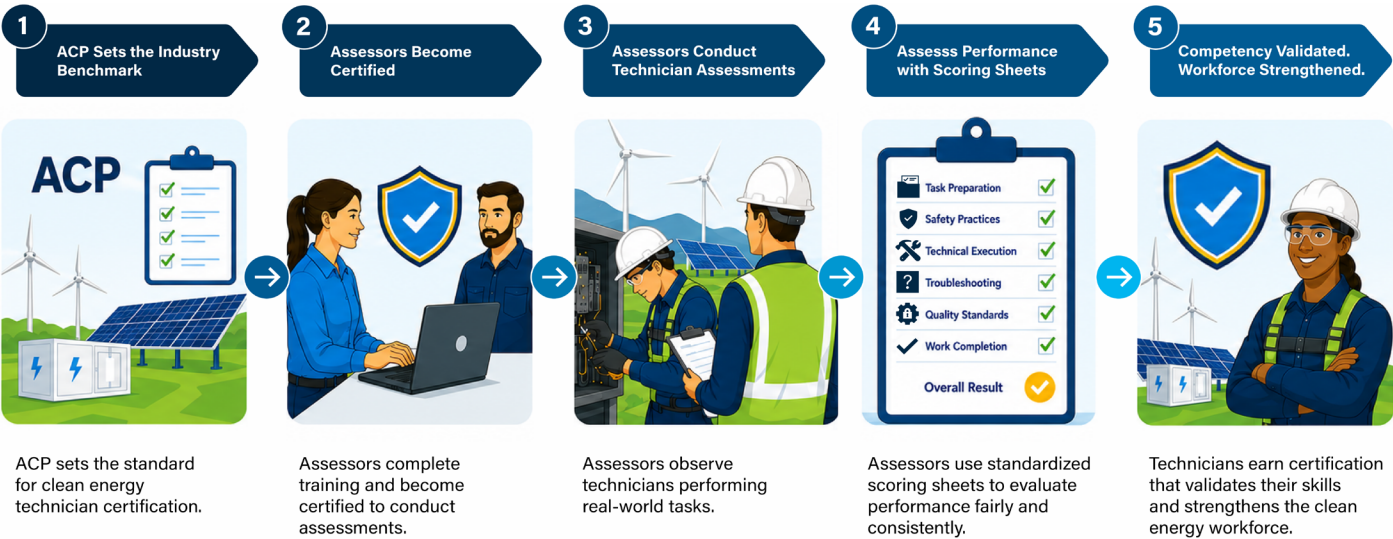

- ✓ Validate existing programs
- ✓ Recognize current technicians
- ✓ Align future assessments with ACP certification
- ✓ Scale certification across their workforce

How Our Certification Framework Works

To become certified, technicians must successfully complete a series of hands-on demonstrations that simulate typical maintenance and repair tasks.

The ACP Workforce Certification Process

Certification Options & Pricing

ACP currently offers certifications for Wind Tech 1, Solar Tech 1, and Battery Energy Storage System (BESS) Tech 1, with additional certifications under consideration based on industry needs.

ACP provides high-quality certification services at competitive rates. Effective June 1, 2026, ACP implemented the following pricing for its certification services:

Category	Services	Validity & Frequency	Price (USD)
Assessor Certification	Assessor Certification	One-time; valid for 1 year	\$1,800
	Assessor Certification Renewal	Annual	\$150
Technician Certification	Technician Certification	One-time; valid for 1 year	\$349
	Technician Certification Renewal	Annual	\$35
Enterprise Certification Recognition*	Enterprise Recognition is a customized engagement that allows ACP to review and validate a company's existing competency assessment programs, recognize qualified technicians, and integrate ACP certification into future workforce development strategies.	One-time	Custom Quote

**The Enterprise Certification Recognition is designed for enterprises with established internal competency assessment programs. It also supports the accelerated, large-scale adoption of certification and the integration of ACP certification into internal processes.
